**BA (HONOURS) CRIMINAL JUSTICE
STUDIES - WATERFORD IT**

2011 - 2014

ABOUT

Qualified Full-Stack Web Developer from Wild Code School specialising in Frontend Development with React. After working in Human Resources & Recruitment for a number of years, I started a new journey to follow my passion. I have always had a great interest in technology and have dreamed of working in a role where I can express my creativity. I am highly motivated, persistent and eager to develop my skills further.

EDUCATION

FULL-STACK WEB DEVELOPMENT BOOTCAMP - WILD CODE SCHOOL

2020- 2021

The Full-Stack Web Development bootcamp consisted of 5 months (700 hours) of classroom learning, individual and group learning, along with group projects, hackathons and presentations. Throughout the 5 months I focused on developing my Frontend development skills whilst also exploring areas of backend development including SQL & Express. I chose Wild Code School because it offered great teachings in the most up to date languages and frameworks including React, context, redux, styled components, working with API's and more. I got a great insight into what it's like to work as a developer while working on class and client projects and using git/github with my team.

PROJECTS & EVENTS:

- Winner of 24 Hour WCS Hackathon
- Took part in 48 Hour Twilio Hackathon
- 2 week group project using HTML5, CSS3, Javascript, & git/github
- 2 month group project using React, Scss, Node, & git/github
- 2 month project working with a client (Authxrs) to develop their new company website. The main technologies we used in this project were React, styled components, framer motion, SQL, express, node, stripe payment system, git/github

NOTABLE COURSES

- Intro to React v5 - Brian Holt
- Creative React & Redux - Simo Edwin
- CSS Grid - Wes Bos
- What is Flexbox - Wes Bos
- Javascript for Beginners - Wes Bos
